- ☐ **Improves** internal **communication** and collaboration between departments

- ☐ **Easy** to set-up, install and adopt

- ☐ **Accessible** from multiple locations anywhere in the world 24/7

- ☐ Already **trusted** by leading aftermarket companies worldwide

ONCE®, is Elcome's unique online cataloguing platform, comprising of six component parts; **Xchecker™, Asset™, Catalogue™, Output™, Bulletin™ and Translator™**.
Our products are exclusively designed for the benefit of automotive parts manufacturers and distributors.

We help our customers work smarter in the global automotive aftermarket.

ONCE® is an intuitive, process driven, global solution that's easy to manage and adopt. By integrating and linking ONCE®'s component parts, catalogue content and application data is more accurate, consistent and put to optimum use by enabling outputs to all required market channels including:

- Multiple Aftermarket Data Standards (TecDoc, ACES, Autocat v9, Amazon, eBay, Halfords & Haynes Pro)
- E-Catalogues
- Print Catalogues
- Websites

Xchecker™

Xchecker is the command centre for all your catalogue data management needs and the foundation stone of ONCE®. It's the central hub that allows you to process and maintain your data, without duplication or repetition. Xchecker transforms and delivers high quality catalogue data compatible to multiple aftermarket data standards.

With Xchecker you are in complete control of your data. Our unique system provides you with the freedom and ease to distribute your data to multiple aftermarket data standards, such as TecDoc, ACES, Autocat v9, Amazon, eBay, Halfords and Haynes Pro, enabling access to the global automotive aftermarket. Plus, utilise and output the same data to other marketing channels, including web and print.

Catalogue™

With Catalogue you can create up-to-the minute, print-ready catalogues, using the exact criteria you want - as often as you want, at the touch of a button.

Catalogue links with Xchecker and Asset to populate your buyers guide and application pages in one seamless process.

Bulletin™

Easily create high-res PDF product bulletins, perfect for communicating with your customers.

Bulletin links to Xchecker and Asset to ensure the most accurate and up-to-date data and images are used in your marketing collateral, helping to reduce lengthy proofing and sign-off procedures.

Asset™

Asset is the online repository for all your digital assets. Upload a high resolution, master asset once, and Asset makes it possible for you to control, customise, convert and re-use that asset again and again. Maintaining an up-to-date library of digital assets is essential for business.

Asset gives you the capability to do this accurately and efficiently. For example, integrate with Xchecker and you can automate complex formatting, naming and distribution tasks. Whilst Asset and Catalogue will build you a print ready catalogue, cover-to-cover at the touch of a button.

Translator™

The automotive aftermarket uses technical language which automatic translation tools may not recognise. Translator enables you to measure the completeness of your content, allowing you to manually amend and localise your product catalogue in up to 34 different languages.

Translator also analyses and reports on any gaps and missing translations and measures the productivity of users.

Output™

This powerful tool gives you full control to manage, map and amend your application and parts criteria data, making it suitable for output to your e-catalogue and multiple aftermarket data standards.

Plus
